

PIOTR DUDZIŃSKI

Senior UX Copywriter / Content Designer

piotr.ndj.dudzinski@gmail.com · 727 912 045 · linkedin.com/in/uxw-piotr-dudzinski

UX writer with 12 years of experience, including 10 years in digital banking — from copywriting to leading content for a mobile app with 3 million active users. I build content design systems, voice & tone standards, and content-first workflows from scratch. I mentor designers, collaborate with legal and compliance, and make sure content quality doesn't disappear during handovers. I also build tools: Figma plugins, AI agents, and Make.com pipelines that remove bottlenecks and scale content operations across distributed teams.

WHAT I BRING TO THIS ROLE

- 10 years in banking content

Santander Bank Polska — mobile app, web, SMS, push, regulatory content. I know the constraints: legal review, compliance, plain language in a regulated environment.

- Content standards and systems

I've built voice & tone guidelines, content component libraries, and editorial standards adopted across distributed teams — exactly what the role requires.

- Plain Language Certificate (mobile banking)

Led the team to achieve formal Plain Language certification for Santander's mobile app — working through legal and compliance constraints while keeping content accessible.

- Stakeholder communication

Regular presentations to senior stakeholders at Santander. I back content decisions with user research and data — and I know when to push back and when to adapt.

- Cross-functional fluency

I work daily with UX Designers, Product Owners, developers, and legal teams. I translate between them — and I guard copy consistency through the entire design-to-production pipeline.

PROFESSIONAL EXPERIENCE

Senior UX Writer · Content Operations Lead

Jan 2024 – present

Flying Bisons · Warsaw · remote

- Owned content end-to-end across every project: from strategy and UX design through UI and handover. Guarded copy consistency to prevent unreviewed changes reaching production.
- Built and ran UX writing training sessions for designers and PMs — raising content quality across teams that had no dedicated writer before.
- Identified repetitive workflows and built AI-powered automation (Figma plugins, Make.com pipelines) that became default team tooling, saving 40+ hours/month.
- Established content design systems with component documentation and editorial standards for distributed, international teams.
- Managed up to 5 concurrent projects across retail, e-commerce, and government sectors.

Senior UX Writer · Content Lead

Nov 2022 – Oct 2024

Santander Bank Polska · Poznań

- Led content for the Santander mobile banking app — 3M active users, 3,000+ translation keys across 5 languages (PL, EN, UA, RU, ES).
- Led the team to achieve a Plain Language Certificate for the mobile app, navigating legal and compliance constraints while keeping content clear and accessible.
- Built component libraries and editorial standards adopted across the organisation.
- Presented content strategy to senior stakeholders using user research and data analytics.

Copywriter → UX Writer

2014 – Oct 2022

- Created content across 6 channels: blog, website, mobile app, desktop banking, SMS, push notifications.
- Led outage and maintenance communications — coordinating with press officers, deployment teams, and compliance.
- Delivered internal communications and training materials for bank employees.

FEATURED PROJECTS

Figma Plugin Suite for Content Operations

One UX writer, 20 designers. Every microcopy draft required a writer review — a bottleneck that slowed the entire design process. With no prior JavaScript experience, I built a Figma plugin that lets designers create solid microcopy drafts without waiting for a writer. Self-taught the full stack (JavaScript, Cloudflare Workers, Figma API) through AI-assisted learning — 86 iterations over 60 days. Result: 10–15 active daily users, designers produce review-ready copy independently, bottleneck eliminated.

Plain Language Certificate — Santander Mobile Banking

Led the content and process work that resulted in a formal Plain Language Certificate for Santander's mobile banking app — one of the first in the Polish banking sector. The project required coordinating content decisions across legal, compliance, and UX teams, rewriting hundreds of microcopy strings, and building internal standards that made plain language a default — not an afterthought. The certificate is an industry-recognised proof that complex financial content can be made genuinely accessible to users.

AI Content Pipeline

Built an automated content pipeline in Make.com connected to Claude API — 6 specialised AI agents in sequence (Strategic Writer → Content Writer → Copywriter → UX Writer → Corrector → Editor). Turns a multi-day production cycle into minutes. Saves 40+ hours/month. Now the default starting point for content projects at the agency.

SKILLS & TOOLS

UX Writing & Content Design: Voice & tone, content systems, plain language, WCAG, microcopy, multilingual content (PL, EN, UA, RU, AR)

Banking & Regulated Content: 10 years in fintech/banking, legal review, compliance coordination, onboarding flows, transactional UX

Content Operations: Figma, PO Editor, Frontitude, Lokalise, SULU CMS, Jira, Confluence, Productive

Building & Automation: JavaScript, Figma API, Cloudflare Workers, Make.com, Claude API, Git/GitHub, webhook integrations

Research & Collaboration: Agile/Scrum, Design Thinking, A/B testing, user research, stakeholder presentations

CERTIFICATIONS

2024	Advanced UX Writing — Learn Design
2023	Web Accessibility (WCAG) — Widzialni.eu
2023	UX-PM Level 1 — Symetria
